Textile Sample Care Label &
Amazing Weaves Distinction Awards · Galing

Packaging Instructions
Likha · For LGU and DTI-ROG Use

B Care Label — *attach to each textile sample*

Attach one care label to the back of each 12" × 12" textile swatch. Critical for natural-dye fabrics and handwoven textures that require gentler handling than machine-made cloth.

AWDA 2026 — CARE LABEL

Attach to back of each textile swatch

Care Instructions

- Hand wash only · Cold water only
- Avoid direct sunlight — may fade natural dyes
- Do not wring or tumble-dry
- Dry clean recommended for dense weaves or embroidered pieces
- Do not bleach

Clean and Dry

Ensure fabric is fully dry and dust-free before packing. Moisture trapped in packaging causes mold and mildew, permanently damaging handwoven textiles.

Interior Protective Layer

Wrap each swatch in acid-free tissue or a clean white cotton cloth before placing in the ziplock bag. Prevents direct contact with printed packaging that can transfer ink or chemicals to natural-dye fabrics.

Rolling vs. Folding

Roll — do not fold — handwoven fabric. Folds create permanent stress lines, especially in dense weaves, and weaken threads at crease points. Roll loosely around a tube of acid-free tissue before placing in the ziplock bag.

Outer Packaging

Use a sturdy corrugated box sized appropriately. For bulk ROG shipments use a large balikbayan box (60×45×45 cm minimum) or double-wall corrugated carton. Apply FRAGILE stickers on all four sides.

Care Labelling

Include the AWDA Care Label (Part B) attached to each swatch. Natural dyes and handwoven textures require gentler care than machine-made fabric. Without care instructions receiving officers and judges cannot handle the textile safely.

Individual Swatch Packing — 10-Step Checklist

- ☐ 1. Ensure swatch is clean and fully dry.
- ☐ 2. Roll (do not fold) the swatch loosely around acid-free tissue.
- ☐ 3. Wrap in one layer of acid-free tissue or clean white cotton cloth (interior protective layer).
- ☐ 4. Place inside a moisture-proof ziplock bag. Squeeze out excess air before sealing.
- ☐ 5. Drop one silica gel sachet into the ziplock bag before sealing.
- ☐ 6. Affix the AWDA Sample Tag to the outside of the ziplock bag (fabric-safe string — not tape on fabric).
- ☐ 7. Affix the Care Label (Part B) to the back of the sealed ziplock bag.
- ☐ 8. Place sealed ziplock swatch into the bulk balikbayan box. Pad all sides with bubble wrap.
- ☐ 9. Seal box with heavy-duty packing tape (48mm min.). FRAGILE stickers on all four sides.
- ☐ 10. Attach the AWDA-ROG outer label on the top and one side of the sealed box.
